GAME 305- GAMES AND NARRATIVE

FINAL

Limi's Grimes

Setting: Prologue

General Description: Set in the summer of 1977 in rural America, it is designed as a section that begins at the entrance of a uranium mine that was closed years ago and extends to the first layers of the cave, giving the feeling of "starting out of curiosity but quickly turning into the wrong place." This area, which four young characters (Mark and his friends) enter out of a desire to explore, appears abandoned and silent at first glance; however, as they progress, the abnormal effects of radiation, unexplained biological traces, and signs of "something else" in the cave become apparent. The primary function of this section is to tease the threat that will grow in the main story without directly explaining it to the player and to change the direction of the narrative with the break that will occur at the end of the prologue.

Main Locations

1. Mine Entrance and Warning Area: Rusted signs, closed entrance barriers, traces of abandoned equipment, and the initial feeling of a seemingly "safe" void. The characters' approach to each other and the player's initial orientation are shaped here.

2. Upper Tunnels (First Exploration Corridors): Straight lines, branching points, and narrow passages begin to draw the characters "inward." Here, environmental clues (falling rocks, distant echoes, abnormal surfaces) gradually increase.

3. Anomaly Traces Area (The Touch After Area): A layer that heightens unease with egg/film-like traces on the surface, biological remains, and an "abnormal" sense of contact. It is one of the main thresholds that establishes the horror tone of the Prologue.

4. Interlude Chain (Silence–Sound–Deception): A transitional area where characters are guided by sound and briefly separated, then reunited, giving the player both a sense of "insecurity" and "something more real is behind this."

5. Mine Rail Track and Old Transport Area (Point of Intensified Contact): Abandoned rails, broken cars, and a track leading deep into the ground; the space now bears traces of being "man-made" but conveys a sense of lost control.

6. Deep Conflict Zone (Bear Encounter Area): The climax of the prologue; here, the environment is no longer just narrow and dark, but also "corrupted" and dangerous. Characters clearly feel the effects of mutation here, and an inevitable conflict arises.

Impact on the Story

Relationship Between Setting and Theme: The prologue setting embodies the tension between “curiosity–courage” and “fear–survival.” The player's early choices affect the pace of progression and the characters' approach to each other; however, the results are not fully explained and are carried over into the main story as a “shadow.”

Quests: Quests in the prologue are designed to introduce environmental hazards. For example:

- Finding direction in the upper tunnels and advancing deeper.
- Sensing the “abnormal” presence by examining traces of anomalies.
- Breaking the sense of security with moments of divergence/deception in the chain of events.
- Approaching the inevitable conflict in the deep region and setting the stage for the final choices.

Role in the Narrative: In the Prologue, the setting is not merely an opening scene, but a narrative device that invisibly establishes the core threat of the main story. Each step the characters take into the cave accumulates “forewarnings” of the great danger that will later emerge. The rupture at the end of the chapter leaves the player with both a sense of loss and curiosity; thus, the transition to the main character is carried not by the burden of explanation, but by the spatial and emotional logic of the prologue.

Setting: Main Game

- **General Description:** Set in the summer of 1977 in a rural area of America, this is a realistic horror story that takes place around a uranium mine that was closed years ago. From the outside, the area appears peaceful and “forgotten”; however, deep within the mine, there are abnormal effects of radiation, unexplained biological traces, and a hidden threat linked to a nearby secret facility. The player enters the cave as a CIA agent arriving in the area after the losses experienced in the prologue; while the goal may seem to be “exploration,” as the player progresses, the primary objective becomes survival and understanding the truth.

Main Locations

1. Town and Peripheral Road (Entrance Area): A low-density settlement that conveys the agent's arrival in the region. An area where local rumors, clues about missing children, and the mine's “unspoken” past are hinted at.

2. Abandoned Mine Entrance (Preparation and Threshold): A threshold space where the player weighs their equipment before entering the cave, and where decisions come back to haunt them later. Warning signs, rusty equipment, and closed doors undermine the sense of security.

3. Upper Tunnels (Tracking Corridors): The section where the initial exploration flow takes place, where traces left from the prologue (some routes distinct, some faint) can be followed. Here, the player gradually notices the “wrong” details.

4. Intermediate Collapse and Minecart Track (Escape Mechanics): A critical area that produces different experiences after the fork. One track features a sense of collapse and loss of consciousness; the other track highlights reflex/rhythm-focused escape dynamics using a single-person minecart.

5. Deep Layers (Increased Exposure): The section where uranium veins intensify, sounds cease, and the ecosystem appears “depleted.” Here, the threat makes its presence felt in a dominant way, even without being directly visible.

6. Heart Region / Final Arena: The deepest, most intense, and most “irreversible” area of the cave. The game's final showdown takes place here; the environment creates both physical and sensory pressure to support the outcome of the finale.

Detailed Atmosphere and Emotional Tone

- **Color Palette:** In the outside world, sun-baked yellows, dusty browns, and rust tones; in the inside world, cold grays, coal black, and dirty green accents reminiscent of radiation. Warning signs and equipment labels heighten the visual tension.
- **Air and Environment:** Outside, dry heat, wind, and dust; inside, intense humidity, dripping water, cold drafts, and intermittent rockfalls create a constant sense of unease. Sound design features distant echoes, metallic squeaks, and the gradual disappearance of “normal” animal sounds.
- **Technological Structures:** The analog world of 1977 is evident: old mining lamps, cables, warning signs, rusty mechanical systems, limited communication. Instead of modern “high technology,” the unreliable realism of the old infrastructure carries the fear.
- **Time and Era:** Limi's Grimes takes place in the summer of 1977. This period creates an atmosphere where access to information is limited, communication is slow, and evidence can easily “disappear.” This historical backdrop reinforces both the institutions' reflex for secrecy and the character's isolation.
- **Relationship Between Setting and Theme:** The setting carries the tension between “the allure of the unknown” and “the price of exposure.” The cave functions not just as an underground passageway but as a system that tests the player's physical and psychological endurance.

Tasks: The tasks the player encounters are shaped by the nature of the environment. For example:

- Tracking clues related to the prologue and finding your way by following tracks in the upper tunnels.
- Advancing through the deeper layers, accepting the risk of exposure, and understanding the “scale of the threat.”

- Reaching the final area by making escape/combat decisions at critical points and preparing for the final showdown.

Role in the Narrative: The environment is not merely a backdrop; it is an active element that limits and guides the player's decisions through gameplay. Radiation intensity, visibility (flashlight/battery), sound, and confined space pressure invisibly test what the player values with every step. Thus, the outcomes seen in the finale feel like the natural continuation of the logic established by the environment from the start, not something added externally.

Characterization

Patrick

- **Definition:** Patrick, who has a difficult-to-control, childish, and immature personality, is the most unpredictable member of the group.
- **Personality:** He thrives on living on the edge, taking extreme and random risks without hesitation. He lacks the ability to assess the consequences of his actions or the dangers they may create.
- **Impact:** His behavior is entirely driven by momentary impulses, making him both a risk and a source of chaos for those around him.

Kelly

- **Definition:** An authoritarian figure who grew up under intense parental pressure and carries the scars of this pressure in their character.
- **Personality:** Has an overly controlling and harsh temperament. Lives in a constant state of alertness and high alert.
- **Condition:** Suffers from chronic panic attacks; this causes him to be tense and on edge at all times.

Brian

- **Definition:** A character who has not yet formed their own identity and whose character development is incomplete.
- **Personality:** Rather than making their own decisions, they are completely shaped by their surroundings. They have surrendered their will to Patrick; they do exactly as he says.
- **Development:** Their personality can be easily manipulated and changed depending on their environment and the people around them.

Mark (False Main Character)

- **Role:** A figure who gives the impression of being the main character at the beginning of the story but is actually the “False Main Character.”
- **Description:** A character who is talented and possesses natural leadership qualities, with a high ability to guide those around them.

- **Personality:** Self-sacrificing; puts themselves forward for the good of others. They are the guiding and protective force within the group.

True Main Character (Player Character)

- **Role:** CIA Agent
- **Description:** An operational figure who arrives in the area weeks or months after the disappearance case in the Prologue section. Initially has limited prior knowledge about the missing children and anomalies reported in the area.
- **Abilities:** Unlike the young people at the beginning of the story, he is highly field-trained and well-equipped. However, the chaotic nature of the cave and the biological threats he encounters constantly challenge his planned and prepared state.
- **Personality and Dramatic Focus:** The character experiences a deep internal conflict between his desire to “control” the unknown and the “loss of control” created by radiation and biological threats.
- **Impact:** While his professional background gives him an advantage, his skills alone will not be enough to ensure his survival in the face of the cave's unpredictable structure.

Plot and Structure

The narrative structure of the game is based on a String of Pearls flow on the surface, while in the background it is built on Hidden Branching mechanisms that take shape according to the player's decisions. The story consists of a tragic beginning, an operational development, and different endings based on choices.

I. Prologue: Tragic Beginning (Summer 1977)

Description: A self-contained section that establishes the thematic and dramatic foundation. The player controls Mark, the “False Main Character.”

- **Opening Event:** Mark and his friends enter an abandoned uranium mine to escape the gloom of the economically collapsed town of Limi.

First Critical Choice (Approach to Exploration)

- **Fear (Cautious):** Changes character behavior and threat perception. Makes the traces Mark leaves in the main game more noticeable.
- **Brave:** Deepens character relationships but makes tracking harder in the main game, with fewer items found.
- **“The Touch” Sequence:** The group encounters a mysterious, light-emitting formation. Different micro-events and psychological experiences occur depending on the path chosen.
- **Tension Phase:** The player's sense of security is shaken by fake threats created through Patrick and sudden noises.

- **Climax:** A mutated bear appears. The player makes quick decisions (rescue, escape, stall).
- **Outcome:** The cave collapses, resulting in a tragic ending where all characters die. These choices determine the hidden variables in the main game.

Main Game II: Operational Reconnaissance and Branching

Definition: Transfers the uncertainty created by the Prologue into a “gameplay-focused” structure. It focuses on the CIA agent's progress through the cave.

Stage 0: Preparation (Loadout)

- **Inventory System:** Strategic choices are made from a total capacity of 100. Weapons (Pistol/Shotgun), ammunition, batteries, and bandages share the same capacity pool. This phase establishes the fundamental tension between firepower and survival.
- Total carrying capacity: 100

Category	Item	Capacity	Note
Required	Perry weapon (SEAL 7)	0	Passive item; not optional
Required	Flashlight	0	Not optional; number of batteries selectable
Weapon	Pistol	15	Optional; at least 1 weapon must be selected
Weapon	Shotgun	30	Optional; can be taken with a pistol
Ammunition	Pistol bullets (1 pack)	5	Takes up less space
Ammunition	Shotgun shells (1 pack)	10	Takes up more space; higher power
Consumables	Battery (1 unit)	10	For flashlight; number selectable
Consumables	Bandage (1 unit)	10	Health/healing

This scene establishes the core tension of the main game: firepower, vision, and survival compensation share the same capacity pool. After this preparatory scene, the cutscene of arriving at the cave opens. At the cave entrance, control of the character is handed over to the player. (This is where the player fully begins the game.)

Stage 1: Exploration and Anomalies

Radiation stones and uranium veins are observed in a low-tempo atmosphere. Depending on the choices made in the Prologue (Fear/Brave), following Mark's trail becomes easier or more difficult.

Stage 2: First Threat and Fork in the Road (Key Branch)

The first encounter with an infected rat occurs. While escaping the subsequent rat horde, the player chooses the first branching point:

- **Path A (Fall):** The character falls deep and encounters a mutated bear (Mini Boss).
- **Path B (Minecart):** A QTE-based minecart sequence. Success leads to the boss area, failure results in death.
- **Mini Boss Fight:** Encounter with the mutated bear. Weak point-focused attacks, dodging, and Parry (SEAL 7) mechanics are used.

Stage 3: The Heart of the Cave and Final Decisions

3.1 Threat Scale: The pace slows after the bear. Observe how the monster has turned the cave into a “feeding ground” and the intensifying radiation.

3.2 Pre-Final Boss Branches:

- **Branch 1 (Exposure):** Choose a route with high or low radiation.
- **Branch 2 (Human Connection):** Confront or ignore a relic belonging to Mark.

III. Result: Finals Based on Player Choices

The final boss battle takes on three different forms based on the Exposure and Human Connection points accumulated by the player:

Final 1: Full Transformation (High Exposure / Low Connection)

- Form: Mark has completely transformed into a monster and lost his humanity.
- Gameplay: Very aggressive, panic and pressure-focused, unforgiving tempo.

Final 2: Semi-Consciousness (High Exposure / High Connection)

- Form: Mark's human traces and moments of hesitation are selected.
- Gameplay: Attack and pause cycle; a fight that evokes moral discomfort.

Final 3: Legacy (Low Exposure / High Bond)

- Form: Mark is absent; the final boss is in its core form.
- Gameplay: Weak points are known thanks to notes left by Mark. Strategic and a feeling of a “hard-won victory.”

Narrator and Point of View

The game's narrative structure is designed around a two-stage limited perspective to ensure the player becomes emotionally attached to the story world, to maintain uncertainty, and to make the weight of choices felt.

I. Perspective: Third-Person

Definition: Both the Prologue and Main Game are presented from a third-person perspective.

- **Prologue:** Events are experienced through the perceptions and reactions of Mark, the controllable character.
- **Main Game:** Focuses on the CIA agent's perspective using a third-person over-the-shoulder camera.

Effect: Limited Information: The player only has access to the information known to the character they control. The nature of the monster and the “true” reason behind the events of the Prologue are not explicitly explained.

- **Mystery and Curiosity:** This limitation is the main source of tension. The player is forced to make sense of things through environmental clues and gameplay outcomes.
- **Shared Uncertainty:** The player experiences the abnormal situations and unexplained events in the cave alongside the character, without any clear explanation.

II. Narrator Type: Third-Person Limited

Definition: The narrator is not in an “omniscient” position, knowing all the facts of the world. Knowledge is deliberately limited.

Usage and Functioning:

- **Descriptive Language:** The narrator maintains distance from events; information is conveyed indirectly through dialogue and reactions between characters.
- **Character-Focused Clues:** * Patrick's uncontrolled behavior, Kelly's warnings, and Brian's shyness provide clues for the player to evaluate events. The narrator does not interpret these clues; the responsibility for evaluation is left entirely to the player.
- **Dramatic Change:** This deliberate lack of information sets the stage for perspective shifts that will emerge in later sections, making them more meaningful and dramatic.

III. Player-Environment Interaction and Information Flow

- **Narrative Goal:** In the Prologue section, the player cannot see the long-term effects of their decisions and cannot understand the real reasons behind events. This makes the narrative both a closed experience and creates an element of curiosity for the main story.
- **Environmental Narrative:** Since there is no first-hand explanation, the player constructs the story in their own mind through biological traces, signs of radiation, and the characters' reactions.
- **Perspective Limitation:** Despite the CIA agent's preparedness, their lack of knowledge about the nature of the cave supports the theme of “fear stemming from the unknown.”

Conflict

Prologue Conflict

The conflict structure in the Prologue section of the story progresses on a multi-layered plane, simultaneously incorporating both external and internal/interpersonal elements. The primary external conflict stems from the unknown and uncontrollable threat the characters encounter in the abandoned uranium mine. The cave's physical structure, the abnormal effects caused by radiation, and the unexplained biological traces constantly undermine the characters' sense of security, keeping the conflict alive.

1. Primary Conflict: Unknown Threat Inside the Mine

Main Problem: The characters face an unidentified danger in an abandoned uranium mine.

Source of Conflict

- The physical structure of the cave
- Abnormal effects caused by radiation
- Unexplained biological traces

Progression in the Story: These elements constantly undermine the characters' sense of security and cause their perception of threat to intensify.

2. Secondary Conflict: Intragroup Interpersonal Tensions

Fundamental Tension: Parallel to the external threat, internal and interpersonal conflicts developing among the characters form an important component of the narrative.

Source of Conflict:

- Patrick's uncontrolled and risk-prone attitude frequently clashes with Kelly's overly cautious and oppressive approach.
- Brian's indecisive and follower-like nature contributes to the disruption of the group's internal balance.

The Player's Position: Mark, controlled by the player, is forced to take on a leadership role amid these tensions and tries to prevent the group from falling apart.

3. Choice-Based Conflict: Fear and Brave-Focused Choices

Function of Choices: The Fear and Brave-focused choices presented to the player serve to deepen the conflict.

Scope: While these choices do not directly alter the direction of the story, they determine the characters' reactions to danger and their relationships with each other.

4. Thematic Conflict: Human, Threat, and Decisions

Expansion of Conflict: Conflict takes shape not only between “human and threat” but also between “human and their own decisions.”

Emotional/Moral Burden: Throughout the prologue, the player begins to feel the moral and emotional weight of the decisions they make as they move toward an inevitable end.

Main Game Conflict

1) External Conflict: The Ultimate Threat and Its Consequences

Main Problem: The player battles the ultimate threat fueled by radiation and the consequences it creates in the cave.

Forms of Conflict:

- Infected rat swarms
- Mutated bears

2) Environmental Conflict: Pressure of the Space and Resource Management

Main Problem: The cave's darkness, limited visibility (flashlight + battery), confined spaces, and radiation constantly force the player into resource management.

Sources of Conflict:

- Darkness and limited visibility
- Dependence on flashlight and battery usage
- Movement restrictions in confined spaces
- The constant pressure of radiation

3) Internal Conflict: Desire for Control and Uncontrollable Reality

Main Issue: The CIA agent is caught between the desire to “control” and the uncontrollable biological/radiological reality.

Reflection in Gameplay: The choices the player makes during preparation (loadout, ammunition, batteries, bandages) translate this internal conflict into gameplay.

Climax

The climax of the game is the most critical stage where the tension built up throughout the story transforms into a concrete threat, pushing the player's moral and physical limits to the extreme. The narrative reaches its peak in two main stages.

I. Prologue Climax: Physical Threat and Inevitable End

Definition: The moment of confrontation when the biological and environmental abnormalities sensed throughout the cave evolve into a physical danger.

Event: Occurs with the sudden appearance of a mutated bear. The tension gradually built up in previous scenes becomes concrete here.

Decision Mechanism: The player must make quick, instinctive decisions:

- Which friend to try to save.

- Whether to flee or distract the creature.

Dramatic Effect: These choices are not enough to save the characters; a tragic ending, resulting in the death of all characters and the collapse of the cave, is inevitable.

Thematic Function: This confrontation between leadership, sacrifice, and the survival instinct forms a critical foundation that defines Mark's role in the story and his meaning in the main narrative.

II. Main Game Climax: The Great Confrontation and Final Decision

Definition: This is the final boss encounter in Stage 3.3. More than just a single "big battle," it is a moment of confrontation where the consequences of decisions accumulated throughout the game are revealed.

Forms of the Final Confrontation (Based on Hidden Variables)

The enemy the player faces and the nature of the fight change based on the player's Exposure and Human Connection scores:

1. **Mark - Full Transformation Form:** A very aggressive and unforgiving pace.
2. **Mark - Semi-Conscious Form:** A fight focused on tension and moral discomfort, with **traces of humanity and hesitation.**
3. **Main Threat - Core Form:** A more strategic battle using the clues left by Mark.

Climax's Main Options and Philosophical Questions

In the finale, the player shapes one of three main paths that will determine the conflict between order and freedom:

Destroy the System (Rebellion Path): The complete destruction of the Central Eye. As a result, freedom is achieved in the city, but great anarchy and chaos ensue.

- Question: "When freedom brings chaos, will people say it was worth it?"

Reforming the System (Reform Path): Changing the code to make the system fair. A delicate and fragile balance is established between freedom and order.

- Question: "Is reform possible, or will people always revert to conflict?"

Defending the System (Conformity Path): Preserving the current order and eliminating resistance. Order is established in the city, but individual freedoms are sacrificed.

- Question: "What is the cost of preserving order?"

III. Climax's Impact on Story and Gameplay

- **Personal Transformation:** Depending on their choices, the main character (CIA Agent) becomes either a system agent left alone with their conscience, a pioneer of fragile balance, or a freedom fighter facing anarchy.

- **Gameplay Elements:** Reaching the climax involves infiltrating the tower/center, hacking mechanics (mini-games), and critical NPC interactions (support or opposition from characters such as Lila, Arlen, or the Resistance Leader).

- **Dynamic Responses:** The Central Eye passively participates in the narrative by questioning the player's decisions and delivering final words that emphasize the philosophical weight of their choices.

Theme

The thematic structure of the game is built around human reactions to the unknown, the illusion of control, and the eternal conflict between freedom and order.

I. Main Themes

1. Freedom and Order

Fundamental Questions:

- "Is it right to give up freedoms in the name of preserving order?"
- "If freedom brings chaos, will people say it's worth it?"
- "Is a more just order possible, or are people always doomed to submit to oppression?"

- **Functioning:** Through the Central Eye system in Panoptikon City, the necessity for individuals to sacrifice their freedoms to maintain order and the social/individual conflicts this creates are explored.

2. Exposure and Human Connection

- **Exposure:** Radiation and biological threats are treated not merely as environmental risks, but as forces that transform identity and the body.

- **Human Connection:** The bonds formed in the Prologue and the attitude of revisiting or avoiding these bonds in the main game determine the ethical and emotional weight of the finale.

II. Secondary Themes

- **Illusion of Control and Encounter with the Unknown:** The fragility of the control humans believe they have in the face of danger is emphasized. Although the player believes they are directing events with their decisions, the outcome is sometimes inevitable.

- **Surveillance and Privacy:** It is questioned whether constant surveillance increases security or destroys privacy. The contradiction between Central Eye's claim of crime prevention and society living in fear is explored.

- **Oppression and Resistance:** The choice between living under an oppressive regime and fighting for freedom at the risk of chaos is questioned.

- **Sacrifice and Responsibility:** The pressure on characters in leadership positions (such as Mark) to protect others and their instinctive decisions are treated as a struggle to preserve human values.

- **Technology, Science, and Humanity:** The debate over whether technology should be used for control or service is discussed. The vulnerability of humanity is explored as a result of the overflow of powers (radiation, mutation) that science and humans seek to control.

- **Chaos and Anarchy:** The cost of destroying order to achieve freedom and the anarchy that ensues when the system collapses are presented as thematic elements.

III. Thematic Development and Experience

- **Beginning:** It begins with the characters being placed in an unknown threat. The theme blossoms with the realization of the system's injustice (the Lila case) or uncontrolled forces (the abandoned mine).

- **Development:** The player is forced to make choices between the rigidity of the system and the chaos of resistance, between fear and courage. During this process, the tension deepens through philosophical dialogues (Central Eye, Resistance Leader, Arlen).

- **Resolution and Inevitable Transformation:** The player's decisions regarding exposure and human connection combine with the idea of “inevitable transformation,” which alters the body and mind, to determine the ending. The city's fate is sealed between complete order, fragile reform, or anarchy that brings freedom.

IV. Thematic Questions

The game leaves the player with these philosophical questions:

- “Can a true balance really be struck between freedom and order?”
- “Can an individual's life be sacrificed for the sake of social order?”
- “Should technology serve humanity or control it?”
- “How vulnerable is humanity in the face of powers it cannot comprehend?”

Which Types of Narrative in Games

The game's narrative structure is built on a hybrid model that provides the player with both a strong story framework and a sense of the weight of their choices. In this model, Embedded and Emergent narrative types intertwine with different structural mechanics.

I. Narrative Models and Structural Approaches

1. String of Pearls Model

- **Prologue:** The narrative presents a closed dramatic structure that progresses toward an inevitable conclusion. The player cannot change the main flow; the tragic effect and sense of "inevitability" resulting in the death of all characters is preserved in this model.

- **Main Game:** Events flow towards the finale in a specific order, with an increasingly fast tempo. While preserving the linear dramatic flow, it provides the player with motivation to progress.

2. Branching Narrative

- **Visible Branching:** Critical path divergences in the main game that the player is aware of (e.g., Path A/B choice in Stage 2 and two key paths in Stage 3.2).

- **Hidden Branching:** This system operates both in the Prologue and deep within the Main Game.

    - **In the Prologue:** Fear/Brave choices do not change the outcome but alter character behavior and atmosphere.
    - **In the Main Game:** Exposure and Human Connection variables accumulate unnoticed by the player; they determine the final boss form and the ending.

II. Treatment of Narrative Types

1. Embedded Narrative

Forms the fixed elements and basic framework of the story.

- **How it works:** It is conveyed through environment design, NPC dialogues, and Central Eye's explanations.
- **Function:** It introduces the world of Panoptikon City, presents "story hooks" such as Lila being marked as a threat, and emphasizes the main theme by preventing events from spiraling out of control.

2. Emergent Narrative

The narrative that naturally takes shape as a result of the player's actions and choices, making each experience unique.

- **How it works**: Player Choices: Decisions such as joining the resistance to save Lila or defending the system diverge paths.
- **Dynamic Events:** Reactions such as Central Eye increasing security based on success/failure change the world.
- **NPC Relationships:** The approach of characters such as Arlen (whether friendly or hostile) is shaped by the player's actions.

III. Narrative Flow During Gameplay

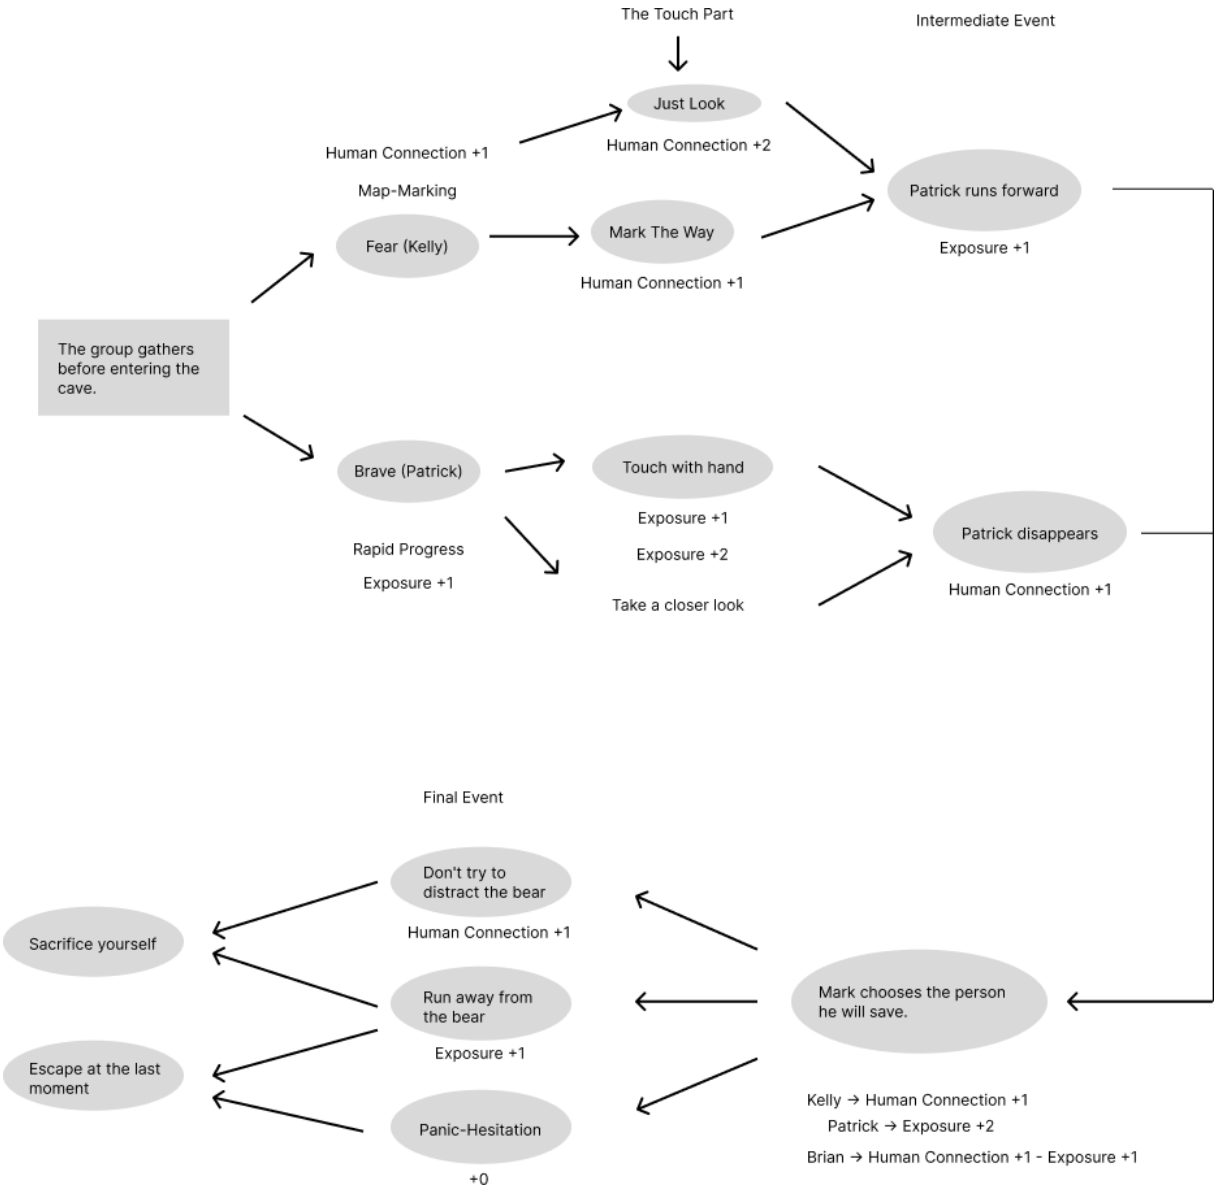

- **Beginning:** The embedded narrative dominates; world rules, the Central Eye system, and Ethan/Elara's life are introduced.
- **Middle Section:** The emerging narrative takes over. The story becomes dynamic with sabotage missions, NPC interactions, and branching points.
- **Climax:** The embedded narrative forces the player into a major decision (Destruction, Reform, Defense), while the emerging narrative reveals the delayed consequences of previous hidden choices (Exposure/Human Connection) in the finale.
- **Outcome:** Unique endings involving anarchy, reform, or absolute order are generated based on choices.

IV. Advantages of the Hybrid Approach

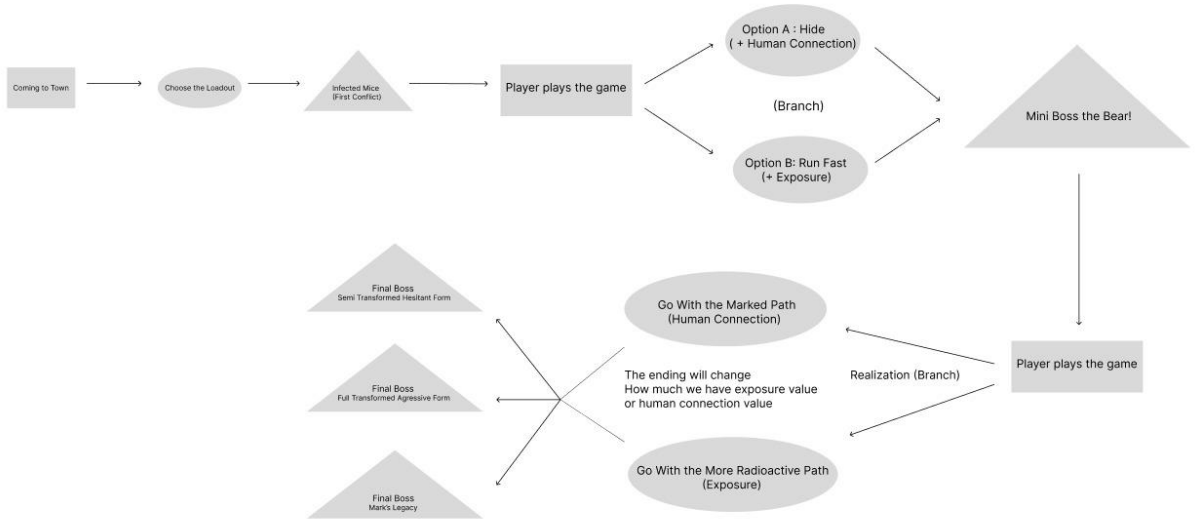

- **Balance:** Maintains equilibrium between the player's freedom to decide and narrative control.
- **Delayed Impact:** While the player feels the immediate impact of their decisions, they only become aware of the long-term consequences (such as the boss form in the finale) at the end of the game.
- **Thematic Coherence:** The theme of Freedom and Order is framed by the embedded narrative and transformed into the player's personal moral questioning through the emerging narrative.

Main Game

Moodboard

The game's mood board is based on the deterioration of the natural structure of an abandoned uranium mine. The spaces are disordered, have lost their function, and are no longer suitable for human use. The walls are uneven; the stone surfaces are cracked in places and abnormally smooth in others. This smoothness gives the impression of having been melted or chemically altered rather than naturally eroded.

Spatial Structure

Cave tunnels:

- Narrow
- Low-ceilinged
- Curved and with a structure that restricts visibility.

In some areas, the ceiling:

- Has collapsed
- Is broken
- Appears as if it has been forced open from the inside.

Floor:

- Not flat.
- Covered with rocks, dirt, and metal fragments.
- Expect small rocks to shift and make noise when stepped on.
- This structure forces the player to move cautiously at all times.

Surface and Texture Details

Wall surfaces:

- Show irregular transitions between dry rock and damp rock.

In some areas:

- Darkened
- Bearing burn marks
- Layers with discoloration are visible

Uranium veins:

- Not shiny.
- Does not appear glassy clean.
- Dull, dirty, and cracked.
- The surrounding rock texture is disturbed.

Biological traces:

- Cannot be fully identified.
- Organic but the “living” sensation is unclear.
- They are in the form of residues stuck to surfaces, dried, or semi-fluid.

These textures:

- Are designed in such a way that it is unclear whether they are of animal origin or belong to something else.

Light and Vision

Lighting:

- It is singular and directional.
- The flashlight creates a narrow cone of light.
- The light area is not sharp; darkness spreads softly at the edges.

Light:

- Rather than clarifying details when illuminating an object.
- It emphasizes surface imperfections and irregularities.

In some areas:

- It creates a feeling that light is being absorbed.
- Walls do not reflect light back.
- Visibility distance remains short.

The Physical Source of Sound

- Sounds are tied to the space; they are not abstract.

Audible sounds:

- Small stones falling from the ceiling
- Distant metal scraping
- The rusty squeak of rails
- The irregular echoes of footsteps

Living sounds:

- At the beginning of the game, there are faint insect and animal sounds.

As you go deeper, these sounds:

- Decrease
- Stop
- Give way to silence

Human-like sounds:

- Are unclear.
- Are echoey.
- Their origin cannot be determined.

Technological and Industrial Remnants

Man-made elements visible in the space:

- Rusty rail systems
- Broken mining carts
- Generators in unusable condition
- Warning signs (radiation, no entry)

These objects:

- Are not arranged in any particular order.
- Give the impression of having been left behind haphazardly.
- Suggest that people left in a hurry and without thinking.

Relationship with the Body (Physical Effect)

- The player character's body also behaves as if it were part of the space.

When staying deep for a long time:

- Breathing sounds become heavier.
- Movements become more cautious.

Camera:

- Makes slight vibrations.
- Shows a continuous, low-frequency imbalance instead of sharp jolts.

This effect:

- Is not explained by the interface.
- Is conveyed through physical perception.

General Physical Impression

The physical summary of the moodboard is as follows:

Space:

- Uninhabitable.
- Unsafe.

Surfaces:

- Damaged.
- Familiar but appear distorted.

Light:

- Insufficient.
- Restrictive.

Sound:

- Source is unclear.
- Embedded in the space.

As the player explores the cave, they should think:

- “This is no longer a place, but a state.”

CIA
MIDWAY
DESERT ROAD
TOWN 50 MILES

Game Script - Prologue

Camera	Description	Dialogue
Birds Eye Camera(Tracking)	In the opening scene, the camera follows the car Mark is in. As the car enters the town, the left side of the camera angle shows the mine and the trees there, which appear unhealthy. They park the car in front of Mark's grandmother's house on the street in the center of town.	
Medium Long Shot	Mark sits bored in the living room with his friends. Patrick starts telling the story of the mine that has become the talk of the town. They say Patrick made up this scary story. Patrick gets angry and makes a bet. The four friends set off to get ready at their homes. They agree to meet at Uncle Hank's tire shop at the edge of town in an hour.	**-Mark:** Guys, we need to do something or we'll die of boredom. We can't spend the whole summer like this! **-Patrick (jumping up excitedly):** Did I ever tell you the story of that famous mine in our town? **-The Whole Group:** Oh, Patrick, again? **-Mark (sarcastically):** We know you made that story up, Patrick. **-Patrick (angrily):** I made it up? Fine then. Since you don't believe me, how about we go into that tunnel tonight and see for yourselves? -The whole group looks at each other as if they want to believe. **-Brian:** Everyone grab the necessary gear. We'll meet at Uncle Hank's tire shop in an hour. Is everyone okay with that? **-Mark and Kelly reluctantly nod their heads in agreement.**

Medium Arc Shot (180 Degree)	The camera starts behind the fountain and moves towards the children. At that moment, four friends have gathered. Kelly eagerly shows off the scout badges she brought. Patrick, who is late, comes running and explains that he brought energy drinks and how cool that is.	**-Kelly:** Look at this! I found my dad's old scout signals. **- (Pat Pat Pat... sounds are heard.) While everyone is focused on the scout signals, they suddenly look towards the source of the sound.** **-Patrick (opening the bag):** The strongest energy drinks I could find! We won't even blink all night. Cool, huh? **-Mark (annoyed):** Come on, we've already wasted enough time because of you. Let's get going before anyone catches us.
High Angle Shot	They set off toward the mine, chatting among the barren trees. Mark asks Patrick if he got caught for being late. Patrick flatly denies it.	**-Mark:** Well, Patrick... Is this late arrival because you got caught? **-Patrick (angrily):** No, of course not, Mark! Do you think I look like someone who gets caught? **-Mark (sarcastically):** Well, whatever you say.
High Angle Shot	They stop a certain distance from the mine entrance. The camera starts at the top of the mine and moves 180 degrees behind the children, passing behind them. As this movement occurs, the children approach the mine a little closer. Turning sideways, they excitedly begin discussing how they will enter the mine.	**-Kelly (stressed):** We've made it this far, but how are we going to get inside? **-Mark:** Since it was Patrick's idea, he should tell us. **-Patrick seems caught off guard by the question and starts to stutter.**

Fear

Camera	Description	Dialogue
Knee Level Shot	Kelly bends over her bag. She suggests marking the places they pass with the brush she brought along.	**-Kelly:** Guys, now that we've come this far, it's time to mark our spot.
Medium Shot	Even though Patrick tried to oppose the idea, he couldn't convince the group.	**-Patrick:** I think this is ridiculous. We snuck in here without telling anyone. Let's not leave any traces behind and get caught. **-Mark:** Don't be ridiculous, Patrick! How do you expect us to get out of here without these markers?
Close Up	Kelly makes the first mark.	

Fear -> Just Look

Camera	Description	Dialogue
Back Medium Shot	Patrick sees something like a glowing egg and runs over to get a closer look. Then he calls out to his friends.	**-Patrick:** Hey guys, look, there's something really interesting here!
Over the Shoulder Level Shot (Kelly's)	Kelly thinks getting this close could be very dangerous. She gently pushes Patrick away by the shoulder.	**- Kelly:** Patrick, don't get too close, it could be dangerous.
Ground Level Shot	Patrick's foot catches on a rock and he finds himself on the ground in pain.	**-Patrick:** Ahh!
Pedestal Up	He jumps up angrily. He walks toward Kelly angrily. At that moment, Mark steps in front of Kelly to stop him.	**-Patrick(Angrily):** What do you think you're doing! **-Mark:** Calm down, Patrick. He just wanted to warn you.

Medium Shot	He calmly warns them both. He thinks that just watching is the safest option.	**Mark:** Guys, if we're going to act like this and argue, how about we turn back? It's best to be cautious about what you've seen. We don't know what will happen.

Fear -> Mark The Way

Camera	Description	Dialogue
Back Medium Shot	Patrick sees something like a glowing egg and runs over to get a closer look. He then calls out to his friends. Patrick reaches out his hand to touch this bright object with something floating inside it.	**-Patrick:** Hey guys, check this out—there's something really interesting here!
Close Up	He takes Kelly Patrick's hand and stops her.	
Medium Level Shot	He warns him with a serious look about how dangerous this could be. He then offers him a solution: he could mark the object with a brush.	**-Kelly:** Don't touch anything we don't know about, Patrick! We have to consider the possibility that it could harm us. **-Patrick (with a sad expression):** I was really curious. I don't want to lose this. Maybe we won't see anything else like this as we move forward. **-Kelly (holding out the scout paint in her hand): Look, you can leave a mark with this paint.**
Over The Shoulder	Patrick gives a thumbs-up and artistically and playfully draws a cross with his brush.	

Patrick Run Forward -> Exposure

Camera	Description	Dialogue

Medium Level Shot	Patrick turns to the group and tells them they're boring. He starts running toward the darkness of the cave in a rage.	**-Patrick:** You guys are moving too slowly. You're so boring. I'm going to go ahead a bit and see what's going on.
Medium Level Shot	She complains about Mark Patrick's actions and follows him.	**-Mark:** Patrick, we have to work together. You can't act on your own like this!
Point of view	Mark notices a sound coming from the gutter nearby and leans his head toward it.	
Close Up	Patrick suddenly jumps out of the gutter and scares Mark.	**-Patrick:** Böö!!
Over the shoulder shot	Just as he was about to punch Mark Patrick, he realized it was Patrick in the gutter.	**-Mark:** Patrick, what do you think you're doing? What's the point of these childish jokes?
Close Up	At that moment, Patrick is laughing.	**-Patrick:** HAHAHAHAHA…
Medium Level Shot	The group continues to advance through the cave under Mark's leadership.	**-Mark (To Patrick, indifferently): Let's move on, guys.**
Back High Angle Shot	As the group moves forward, a strange animal footprint appears behind them and a growling sound is heard.	

Brave

Camera	Description	Dialogue
Knee Level Shot	Kelly bends over her bag. She suggests marking the places they pass with the brush she brought along.	**-Kelly:** Friends, now that we've come this far, it's time to mark our progress.
Medium Shot	Patrick objects to this idea. He thinks it will slow them down and says it's not fun.	**-Patrick:** I think this is ridiculous. We could be doing more fun things in the time we'd spend marking this. It just slows us down. **-Mark:** Don't be ridiculous, Patrick! How do you expect us to get out of here without these markers?

Brave -> touch with hand

Camera	Action	Dialogue
Back Medium Level Shot	Patrick sees something like a glowing egg. He calls out to the whole group. Everyone except Kelly runs over to investigate.	**-Patrick:** Hey guys, look, there's something really interesting here!
Medium Shot	Except for Patrick, they all observe him from a certain distance.	
Close Up	The entire group stares at the object in awe. Because they have encountered something they have never seen before. It is as if the glowing thing is not light but electricity. This electricity can even be seen in their mesmerized eyes.	**-Brian:** Patrick, how did you notice this? It looks amazing! **-Patrick:** Honestly, it's the first time I've ever seen anything like this in my life.
Medium Shot	Kelly is still bothered by this situation. She continues to warn the group, but they are so enthralled that they ignore	**-Kelly:** Guys, don't get too close anyway. We don't know what it is.

	her warnings and silence her. This is the second time Kelly has been ignored!	**-Patrick:** What could something this beautiful possibly do to us? Don't be such a coward, Kelly!
Dutch Angle	Patrick approaches the mine, and strangely, this object pulls him toward it, but not physically. He feels it in his soul. He cannot resist and reaches out his hand, touching the mine as soon as he extends it.	
Ground Level Shot	He collapses to the ground. He is so affected that he begins to shout to the group about how incredible this moment is.	**-Patrick:** Guys, this is my first time experiencing this. I can't wrap my head around how something like this could have happened. It was perfect!
Low Angle Shot	Everyone looks at him with excitement, which makes him very happy; he has everyone's approval.	
Over the Shoulder Level Shot	However, he realizes he can't feel his fingertips, and this is very frightening for him, causing his hands to tremble involuntarily from fear.	
Medium Shot	He hesitates to tell the group, but when his friends see the green bubbles in his hand, the group starts to panic.	**-Kelly (Panicked):** Patrick, did those blisters just appear on your hand? What's going on? Don't scare us! **-Patrick:** I don't know either. I guess they appeared because I touched that thing.
Choker	At that moment, Brian comes up with a great idea: ACNE CREAM. And he tells his friends about this idea.	**-Brian:** I have some acne cream with me. How about using this? **Mark: (Surprised):** What? Are you kidding me?

Back Medium Level Shot	This brilliant idea instantly silences Kelly's warnings that they should turn back. Though frightened, they continue on their way.	**-Kelly(Fearfully):** Guys, look, we can still turn back. **-Patrick:** Don't be ridiculous, Kelly! I'm fine. We can't turn back now that we've come this far.

Brave -> Take A Closer Look

Camera	Description	Dialogue
Back Medium Level Shot	Patrick sees something like a glowing egg and calls out to the whole group.	**-Patrick:** Hey guys, look, there's something really interesting here!
Medium Level Shot	While Kelly approaches the object suspiciously and cautiously, the rest of the group carelessly draws near.	
Point of view	The whole group is shocked by what they see. Kelly tells them to be careful, but Patrick mocks her, saying she's boring.	**-Kelly:** Guys, don't get too close anyway. We don't know what it is. **-Patrick:** What could something this beautiful possibly do to us? Don't be such a coward, Kelly!
Close Up (Patrick's eyes)	Patrick approaches to examine the object more closely and thinks he sees things moving inside it.	
Close Up	At that moment, a balloon bursts from the object and hits him on the head.	
Medium Level Shot	Patrick jumps back in fear and falls to the ground. Brian teases him. Mark helps him up while Kelly watches from a little distance. Mark asks Patrick if he's okay. Patrick says he's fine and there's nothing to worry about.	**-Brian(Laughing and mockingly):** What a coward you've become! **-Mark:** Are you okay, Patrick? **-Patrick:** Don't worry, Mark. I'm fine. I was focused on something else and didn't notice.

Close Up	Kelly says things are going to get worse and that they need to listen to her.	**-Kelly:** Guys, look, it's clear things are going to get worse. We'd better turn back.
Medium Level Shot	Mark suggests going back, but Patrick objects.	**-Mark:** I think we should listen to Kelly too. **-Patrick:** Guys, don't forget why we came here.
Pedestal Up	Patrick regains his balance on his second attempt and stands up. He has actually started to see blurry, but he doesn't want to let the group know.	
Medium Level Shot	He gives Kelly a stern look and tells her she's fine, that continuing is no problem.	**-Patrick:** I'm fine too, nothing's wrong with me, as you can see. So we can continue.
Back Medium Level Shot	The group continues to advance into the depths of the cave.	

Brave: Patrick Loses

Camera	Description	Dialogue
Back Medium Level Shot	The group cautiously moves forward, calming Kelly. Brian senses something strange in the twilight cave. His companion Patrick is nowhere to be seen.	**-Mark:** Okay, stay calm and we can continue, Kelly.
Close Up	He explains the situation to Mark in a panic and with utter stupidity, spitting from his mouth.	**-Brian(Frightened):** Mark, Patrick is missing. I don't understand how it happened. He just vanished from beside me.
Back Medium Level Shot	Mark immediately tells the group they need to stay together. He runs with Brian toward the continuation of the path in the cave. (Since the cave path is	**-Mark:** Try to stay calm and don't separate from each other. We'll find him!

	linear, they decide to keep going forward.)	
Low Angle Shot	While running, Brian suddenly stops and says he's tired and catches his breath.	**-Brian:** Guys, I'm really tired. I need to rest a bit.
Over the Shoulder Level Shot	Mark hears a sound echoing through the cave behind him.	
Over the Shoulder Level Shot (From Mark's)	Patrick came out from where he was hiding and honked his horn loudly, startling Mark.	
Tilting Low Angle Tracking Shot	Mark, swaying backward, hears the same sound again and this time stumbles and falls to the ground.	
Close Up	Brian has a cool horn too, and he's grinning smugly.	
Over the Shoulder Level Shot	Mark suddenly grabs Patrick by the collar, but just as he's about to hit him, he feels a small hand cover his arm.	
Medium Level Shot	Kelly and the rest of the team heard the noise and came running. Mark manages to control his anger, but Patrick and Briana threaten what will happen if it happens again.	**-Mark(Angrily):** If something like this happens again, you can imagine what will happen!

FINAL EVENT:

--Mark chooses the person he will save—

Camera	Description	Dialogue
Medium Shot Level	Mark and his friends continue on their way. Mark is still very angry. Tension reigns in the group and no one says a word. Only Patrick is laughing.	
Point Of View Shot	The air horn sounds again. Everyone looks at Patrick, but this time the sound isn't coming from him.	**-Patrick:** Guys, this time it's not me making the noise!
Back Medium Shot Level	The whole team focuses on the source of the sound and sees the bear running toward them, green fluid dripping from its body. Mark is at the back at that moment.	
Medium Close Up shot	The bear swings its huge paws at the group!	

--Mark chooses the person he will save—

1.Kelly

Camera	Description	Dialogue
Over the Shoulder Shot (from Bear)	Mark grabs Kelly's hand at the last moment and pulls her back, and Patrick, who is right behind them, becomes the target of the claw.	**-Mark:** Watch out, Kelly! **-Patrick:** Save me too!
Ground Level Shot	It closes its eyes to life with three huge cracks right in the middle of its body.	
Full Shot	Brian throws himself to the ground in shock. He injures his leg by hitting it against a sharp rock.	**-Brian:** Oh my leg!

2.Patrick

Camera	Description	Dialogue
Over The Shoulder (From Bear)	Mark grabs Patrick's hand at the last moment and pulls him away, leaving Kelly alone with the bear behind him. The bear quickly grabs her by the neck and rips her head off.	**-Mark:** Watch out, Patrick! **-Kelly:** Save me too!
Ground level	His lifeless body slowly falls to the ground.	

3.Brian

Camera	Description	Dialogue
Over The Shoulder Shot(From Bear)	Mark grabs Brian's hand at the last moment and pulls him back, and Patrick, who is right behind him, becomes the target of the claw.	**-Mark:** Watch out, Brian! **-Patrick:** Save me too!
Ground Level	It closes its eyes to life with three slits right in the middle of its body.	

Mark Decides What to Do (decision within 5 seconds):

Keep the Bear Busy:

Camera	Description	Dialogue
Medium Level Shot	Mark and his two friends are unable to recover from the shock of the incident. They witness the bear killing his friends.	
Medium Close-Up	Mark makes a sudden decision and points out the route the rest of the group should take to escape.	**-Mark:** You two get away from this side. I'll try to distract the bear.
Medium Back Shot	He tries to distract the bear and moves in a different direction. However, he cannot account for the bear's speed	

	and turns around at the very beginning of the road.	
Close Up	His intestines protrude from his body.	
Low Angle Shot(Fade Out)	In his final moments, he witnesses the acidic liquid from the bear's roar reaching his friends and burning them alive, and he closes his eyes to life.	

(If the player makes this choice, they are directed to the “Sacrifice Yourself” ending.)

Escape the Bear:

Camera	**Description**	**Diaologue**
Medium Level Shot	Mark and his two friends are unable to recover from the shock of the incident. They witness the bear killing their friends.	
High Angle shot	Mark and his friends start running away without looking back. (As the characters run toward us, the bear's approach is visible from behind.)	**-Mark:** Run fast!
Close Up	The bear's approach begins to be felt on the back of their necks. Green liquid is dripping from the bear's mouth.	

(If the player makes this choice, they will choose again between the endings “Sacrifice Yourself” or “Escape at the Last Moment” in the final choice.)

(If the player cannot choose between the two options within 5 seconds, the “Panic” option will automatically be selected.)

Panic:

Camera	Description	Dialogue
Close Up	Mark cannot move from his spot and freezes.	
Medium Shot	Because his friends rely on Mark, they waste a lot of time, and they all die right there from the bear's violent swipes.	

(The prologue ends here before the final selection screen, and the main game begins.)

Mark Decides: (Distract the Bear)

Sacrifice Yourself:

Camera	Description	Dialogue
Knee Shot (Tracking)	Mark picks up a sharp stone from the ground while running and runs toward the bear.	**-Mark:** You run. I'll try to distract this bear!
Over The Shoulder Shot	He tries to hit the bear, but it doesn't work, and the bear tramples Mark and continues on its way.	
Medium Shot	The bear catches and kills the rest of the team. Mark witnesses these screams in his final moments.	

(The prologue ends here and the main game begins.)

Escape at the Last Moment:

Camera	Description	Dialogue
Medium Shot	Mark and his friends try to run away.	**-Mark:** Friends, run fast!

Knee Shot	Mark realizes they can't escape and knocks over a log on the road so he can get away.	
Ground Level Shot	The team members who get hit by the log become bear food right there. This buys Mark some time.	
Close Up	Mark notices the signal Kelly gave as she entered the cave. He realizes she could have escaped.	**-Mark:** I knew these would be useful to me.
Ground Level Shot	Just as he was about to leave, he suddenly found himself on the ground.	
Over The Shoulder Shot	When he turns around, he sees that the bear has caught his legs. There he loses his life with great regret and disappointment.	

(The prologue ends here and the main game begins.)

Game Script – Main Game

(At the end of the prologue, a black screen appears and this text appears in white, typewriter font, accompanied by typewriter sounds.

Although only a short time has passed since the incident, the entire town has declared mourning. The government has taken notice and imposed a news blackout. The town's anger is growing. After five days, the children's failure to return home has given way to despair.

Camera	Description	Dialogue
Bird Eye	Agent Ryen speeds down the single-lane road in his 1970 black-and-white Impala. ("Gonna fly now... flying high now..." He hums Bill Conti's song "Gonna Fly Now.")	**-Ryen:** Gonna fly now… flying high now..
Point Of View - Camera Shake (From Bag Angle)	Without turning around, while driving, he checks the bags he has brought with him with his right hand and makes sure they haven't fallen.	
Passenger Point Of View	Ryen talks on the phone and gets the latest information. Then he hangs up and opens the door to go outside. (The camera is positioned as if someone is sitting in the passenger seat to Ryen's right.)	**-Ryen:** Four kids? That's so sad, man. -- Got it, okay, someone can use this scout thing. -- Alright, save me some of those donuts, but you gotta watch your form.
Over The Shoulder **(Orbit)**	He takes his belongings from the back seat of the car and moves to the rear. He opens the trunk and takes a step back. The trunk is custom-made, and as soon as it opens, an additional table emerges from inside via a special mechanism, revealing equipment hanging on the trunk walls.	**-Ryen:** Let's see which one we can get**.**

(The CIA takes charge of the situation and assigns its most experienced agent, Ryen Mercer, to shed light on the incident, control the recent leak, and ensure the case is resolved.)

The player selects their “Loadout”

Camera	Description	Dialogue
Close Up	Agent Ryen, ready to begin his mission, spits the toothpick from his mouth onto the ground. His facial expressions, especially his eyebrows, convey the message, “Here we go,” and he begins walking toward the cave entrance, accompanied by the crackling sound of dry branches beneath his feet.	**- Ryen:** I hope I can make it to dinner. Kathleen will be mad at me otherwise.

Infected Mice (First Encounter)

Camera	Description	Dialogue
Pedestal Down	Agent Ryen continues his investigation with heightened vigilance. At that moment, he notices a mouse with glowing green and purple eyes just two meters ahead.	**-Ryen:** Wasn't I the only one on duty? What's Gerald doing here? (A more absurd laugh accompanies this line because he's talking to himself.)
Ground Level	The mouse limps along, completely exhausted. At that moment, a mouse ten times its size, equally bizarre, rushes by, colliding with everything around it, and knocks the little mouse over. It bites into its spine, tearing it apart and paralyzing the little mouse.	**-Ryen:** Holy crap, these jerks are no joke!
Close Up	Then, green fluid dripping from his mouth, he roars at Agent Ryen with all his fury.	

(Player keep playing the game)

Camera	Description	Dialogue
Medium Shot	Due to the noise, dozens of mice can be seen rushing about in a frenzy.	
Back Medium Shot	Ryen decides that running away is the right thing to do and starts to run.	

BRANCHİNG

Option A: (HIDE!)

Camera	Description	Dialogue
Rear Tracking/Follow shot	After tripping over the corner, Ryen sees a groove in the wall and decides to hide.	
High Angle	As soon as he enters the gutter, he realizes it is empty and falls about 3 meters down. He lies unconscious on the ground, face up, arms spread out to the sides. (His condition after the fall is visible. His nervous shouts during the fall indicate the fall itself.)	-**Ryen**: Oh my god, it's happening now!! AAAAAAAGH!
Ground Level Shot	He wakes up and sits up. His hand immediately goes to his waist and checks his first weapon. He looks at the bullets in the magazine. Finally, he searches for his backpack. It's on his right side.	
Close Up	He immediately raises his head and is startled by the sound. It sounds like a human scream, but it's clearly strange. His face contorts.	

Pedestal Up	He gathers his strength. He stands up and begins to walk toward the source of the voice.	

Option B: (Run Fast)

Camera	Description	Dialogue
Medium Shot	Due to the noise, dozens of mice can be seen rushing about in a frenzy.	
Back Medium Shot	Ryan decides that running away is the right thing to do and starts to run. While running, Ryan sees a broken train track ahead and follows it. At the end of the track, he sees a minecart and runs towards it.	**-Ryen:** It would be good if this thing worked.
Rear View	The minecart starts moving and proceeds down the narrow path. It appears to be blocking the way because mice have piled up behind it.	
Close Up	When he reaches the end of the track, Ryen is startled by the sound. It sounds like a human scream, but it's clearly strange. His face twists.	

MİNİ BOSS THE BEAR!

Camera	Description	Dialogue
POV "Reveal" Shot	Ryen calmly moves toward the sound. The narrow path he is walking on slowly begins to open up. He recoils at what he sees. The sound belongs to a strange-looking giant bear.	
Close Up	He questions whether the illusion he experienced was due to the	**- Ryen:** Did this bastard try to bait me?

	excitement of the event or his protective instinct. He shows this with his facial expressions.	
Ground Level Shot	As he approaches, he puts one hand on his gun and the other on the SEAL 7 spray hanging from his pants. He prepares himself for battle.	
Low Angle	As soon as the bear sees him, it spreads its arms wide and puffs out its chest. The flow of green liquid from its body increases. It shakes the stones and soil on the ground and roars as loudly as it can.	

--Mini Boss Stage Playable—

(If full transformation or semi-conscious ending is achieved based on exposure and human connection in the Prologue, a cutscene will play.)

Camera	**Description**	**Dialogue**
Medium Shot	After realizing there was no bear, he roared, dramatically spreading his blood-dripping hands to both sides.	
Point Of View	Suddenly, his brain seems to be taken over, and he focuses on his surroundings and begins scanning the area. The neon green and blood red colors next to his eyes are clearly visible. He pauses when he looks at Mark's body. His hands can be seen reaching out to him.	

Back Medium Shot	He moves forward, throwing Mark's body over his left shoulder. Mark's blood spills onto the ground, staining the bear's back red. The bear drops Mark into a massive entrance inside the cave.	
Pedestal Down	He bows down like in a prayer movement, touches his nose to the ground, and waits.	
Medium Shot Level	At an extraordinary speed, four tentacle-like appendages resembling nerve endings pull the corpse toward itself.	

Branch (Awareness)

Camera	**Description**	**Dialogue**
Back Medium Shot	Ryen stands right in front of the fork in the road.	
Point Of View	He takes out the radiation detector from his pants and checks the readings.	

Make your decision!

A. Go the way with the sign (+Human Connection)

B. Go the way with more radiation. (Exposure)

Branch A.

Camera	Description	Dialogue
Close up	Agent Ryen touches the sign with his hand and begins to move forward.	**-Ryen:** Rest in peace little girl.
Ground Level Shot	While walking down the street, he sees a pair of hiking boots and a tube of cream. This matches the phenotypes in the information he received. He bends down and takes pictures of both.	
Medium Shot	He moves forward and sees the massive entrance on the far left.	
Close Up	He puts on a facial expression that shows he has decided this is the place he was looking for.	

Branch B.

Camera	Description	Dialogue
Point of View	Agent Ryen walks while looking at the radiation device in his hand. The needle is steadily rising.	
Close Up	When Ryen looks down, he sees sparkles on the ground that resemble human veins.	
Close Up	This situation keeps him on edge. He begins to sweat, and a look of anxiety and seriousness appears on his face.	**-Ryen:** I guess this is where it ends. Let's see.
High Angle Back Shot	When the road ended, the needle on the radiation detector broke. This is the place he was looking for.	

Final Boss Half-Transformed Hesitant Form

Openning:

Camera	Description	Dialogue
Over The Shoulder	He stared at the enormous, human-like creature standing before Ryen, but it resembled more of a Frankenstein-like creature with green and purple veins..	
Dutch Angle	The creature makes sounds as if it's talking, but it's impossible to understand what it's saying. It walks toward you in a strange way, like a baby who has just learned to walk.	
Back Long Shot	Ryen takes his gun in one hand and the SEAL-7 spray in the other. He assumes a ready stance, crouching low so he can move quickly.	

Closing:

Camera	Description	Dialogue
High Angle	The boss is lying on the ground. The colors in the veins on his body turn gray. Unlike an inanimate object, he is in human-like pain. His writhing is very human-like.	
Point Of View	Before taking his last breath, he bangs his head on the floor. Then, with his final breath, he struggles to whisper the name Keelllyyy.	

Final Boss Full Transformation Aggressive Form:

Openning:

Camera	Description	Dialogue
High Angle	The boss is lying on the ground. The colors in the veins on his body turn gray. Unlike an inanimate object, he is in human-like pain. His writhing is very human-like.	
Low Angle	Ryen stands before this enormous creature, unable to comprehend what it is, its face missing but with a mouth at its throat, green and purple fluids dripping from every part of its body.	**-Ryen:** Even if I explained it, they wouldn't believe me...
Full Shot	The creature, acting impulsively, immediately spots Ryen and begins charging toward him rapidly and recklessly, using all its limbs.	
Back Long Shot	Ryen takes his gun in one hand and the SEAL-7 spray in the other. He assumes a ready stance, crouching low so he can move quickly.	

Closing:

Camera	Description	Dialogue
High Angle	The boss is lying on the ground. The colors in the veins on his body turn gray.	
Close Up	A horizontal slit forms right in the middle of its body, and a skeleton that clearly belongs to a child bursts out. This skeleton begins to liquefy due to the effects of the radiation it is exposed to.	

Final Boss Mark's Legacy

Openning:

Camera	Description	Dialogue
Point Of View	At the end of the path, Ryen finds an arm covered in mud. In scouting terms, this arm makes a ‘run’ sign. Next to it, a scattered drawing of a worm's body shows that a specific part of it has been circled. This is the clue he was looking for.	
Close Up	Ryen focuses his attention on the creature standing before him, which resembles the synapse he saw in biology class, with its green and white transitioning colors and approximately the size of an adult human.	**-Ryen:** This thing is really fast, I have to be careful.
Medium Shot	This creature is very agile and roams around trying to figure out what's in front of it on the surface of the walls. After returning to the surface, the creature leaps and runs toward Ryen.	
Back Long Shot	Ryen takes his gun in one hand and the SEAL-7 spray in the other. He assumes a ready stance, crouching low so he can move quickly.	

Closing:

Camera	Description	Dialogue
Point Of View	The creature dies in agony. Like a fish pulled from the sea, it tries to move	

	its entire body before dying, but its movements gradually slow down.	
Close Up	After the struggle ends, Ryen cuts off a piece of his body and throws it into the special jar in his bag.	

İskender Arda Gürmeriç: He was involved in the prologue phase of the game, contributing to the development of early ideas and establishing the gameplay.

Kamil Efe Yumurtacı: He was responsible for the prologue and main game scripts and was involved in branching.

Ceren Ünlü: She assisted in the creation of branching and flowcharts and found the concept ideas for the main story.

Yağızalp Alparslan: Made edits to the prologue and main story. Was responsible for characterization.

Berat Berke Akgül: Was responsible for writing the game's backstory and creating moodboards. Worked on integrating the main game mechanics into the game.
